

# Data Sheet 14 (DS 014)

## Railway Stations with Bike Lockers

### What are we monitoring?

Number of railway stations in the Blue Mountains with bike lockers.

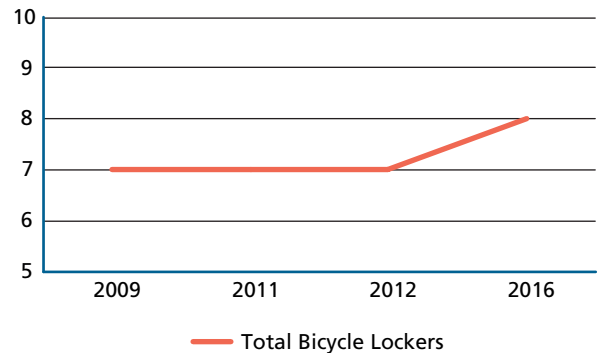

### What is the trend?

The number of stations with bike lockers in 2016 remains stable at seven (the same as in 2009 and 2011). Sydney Trains relocated one locker set from Woodford to Hazelbrook and an extra locker set was added at Blaxland. Each locker set has 4 compartments. Overall the number of locker sets has increased from 7 to 8.

### Why is monitoring this trend important?

Secure bike storage at railway stations contributes to sustainable transport infrastructure that encourages people to ride bikes and in so doing contributes to a more healthy active population. The provision of low cost lockers to cyclists, provides a secure place for them to store their bike, helmet and clothing. As such, these facilities can encourage people to cycle to their local railway station rather than drive and contribute in a small way to reducing car usage with benefit to the environment.
